TERNIENERGIA: established in Bucarest (Romania) the new subsidiary of the Group

- **TerniEnergia Romania Ltd will operate in the fields of renewable energy and recovery of materials and energy, within the business internationalization strategy**

Terni, February 1st, 2013

TerniEnergia, a company active in the renewable energy sector, energy efficiency and waste management, listed on Star segment of Borsa Italiana, as a part of its development strategy and business internationalization has completed the establishment of TerniEnergia Romania Srl in Bucarest (Romania), a 100% subsidiary.

The romanian subsidiary will operate with maximum efficiency in carrying out the substantial program of activities in which the Group expects to develop in East Europe, considered to be strategic in terms of tendency for growth business related to renewable energy and environment.

In particular, TerniEnergia Romania will be involved in preparatory activities to the develop new projects both in the energy sector, through the creation of additional photovoltaic plants, both in the environmental sector, through the possible implementation of activities in the "circular economy" (material recovery).

This Press-Release is also available on the Company website www.ternienergia.com.

TerniEnergia, a company incorporated in September of 2005 and part of Terni Research Group, operates in renewable energy sector and is active in the photovoltaic field. TerniEnergia operates as system integrator, with a turn-key offer of industrial sized photovoltaic plants, on behalf of third parties and on its own mainly through joint venture companies with EDF EN Italia S.p.A. and other leading national players. The Company intends to strengthen its sale activity of energy produced from solar source. TerniEnergia operates in the waste management sector, recovery of the material and energy, development and production of technologies. In particular, the Company is active in the recovery of tires out of use, in the treatment of biodegradable waste through the implementation of biodigesters, management of plant for the biological depuration; decommissioning of industrial plants, recovery of demolition metals and cleaning of industrial sites; development and production of technological apparatus. TerniEnergia, through its controlled company Lucos Alternative Energies, operates in the development of energy efficient plants both through EPC scheme and FTT scheme (Financing Through Third Parties), pursuing the objectives of increasing energy production from renewable sources, of energy saving and reduction of emissions as set forth by environmental European policy. TerniEnergia is listed on STAR segment of Borsa Italiana S.p.A.
